

## At Scale Readiness+ Tool – Guidance

### Completing the assessment

You will be asked to provide some basic user and practice details. You may want to select a project lead to respond to the assessment on behalf of the practice.

You will then be taken through to the questions section. This will take the form of four sets of eight statements with each section focusing on a different perspective – Your Why, Your What, Your People and Your How.

For each statement, you will have the option to express the strength of your agreement / disagreement. You must select one response, but you can change your mind at any stage until you make your final submission.

There are no right or wrong answers, but it is important to provide an 'as is' response to enable practices to build on their current position and thinking.

If you are unable to complete the survey in one go, you can save your progress with the 'save and continue later' function. You will be given a new link providing access your partially completed assessment form. We would advise following the guidance and sending this link to your email address.

If you are already in collaborative discussions, then please name the partners in your submission so that we can arrange a group assessment providing that all named partners agree.

If you are interested in expressing an interest in engaging further with the [Primary Care at Scale Programme](#) then please check the tick box on the final page.

Please note that you can only make **one submission** so please take careful consideration of your responses before you complete the assessment.

Should you have any questions regarding completion or should you need to make any revisions, please email [rachel.edwards@at-scale.co.uk](mailto:rachel.edwards@at-scale.co.uk) and she will aim to get back to you within 2 working days.
