

## **Community Conversations about Medicines Initiative (CCMI)**

Do you have questions related to medicines use and healthcare in general that you have always wanted to ask but never got the opportunity or felt comfortable to ask? Would you like to share your experience and ideas and learn from others? The **CCMI** facilitates engagement in conversations to support you in getting the most benefit from your medicines use, pharmacy services and healthcare services.

We engage in group conversations to provide an opportunity for everyone to contribute to the discussion, learn and share knowledge, which is being created.

We also provide an opportunity to engage in one-to-one conversations to meet individualised needs.

### **Invitation**

Your liaison representative has invited us to your regular meeting.

A practicing pharmacist registered with the General Pharmaceutical Council (UK) will come to your meeting to discuss all matters related to medicines use, medication safety, pharmacy and healthcare related matters. There is no cost to you for the pharmacist to attend your meeting.

Practicing pharmacists are bound by professional standards and hence obligated to ensure data protection, confidentiality and anonymity as required.

We look forward to having a conversation with you.
