

Transforming Cancer Care

Together

Primary/Secondary Care Cancer Networking Event

Chair Dr Suzanne Phillips

Date: **Wednesday 1st May 2019**

Time: **18:00-21:00**

Venue: **Knights Hill Hotel, King's Lynn.**

Clinical networking aims to improve communication and engagement between primary care physicians and secondary care multi-disciplinary teams. Good communication can help to optimise referrals and increases patient satisfaction with their cancer journey. It provides a forum to exchange ideas and experiences on early diagnosis. It can strengthen existing relationships and provide new channels of communication. It provides a forum to share the challenges faced by both parties as well as feedback on what is working well.

What happens...

There will be around 5 primary care physicians and 1 or 2 secondary care physicians at each table. There will be representation from Colorectal (Mr Hyder), Upper GI (Mr Zach), Lung (Dr Durairaj), Gynaecology (Mr Mehr) and Dr Oliver Stovin (Macmillan GP for C&P). You will have 15/20 minutes to talk. There will be a facilitator on each table, taking notes and prompting if needed. Then when the bell sounds Primary or secondary colleagues rotate. There will be a Summary of the evening provided to everyone following the event.

Please advise of any questions to be used in this process by 26th April 2019.

To book please email joannemawson@nhs.net or call 01553 666914 with name, title, contact telephone number and email address.
