

Paediatric MSK Primary Education Event

The child and adolescent East of England Rheumatology Service and the Addenbrooke's Paediatric Orthopaedic Service would like to invite you to the Paediatric MSK Primary Care Education Evening about under 16s with musculoskeletal problems.

On Wednesday 26th June we are hosting a free education evening on the topic of common MSK problems in children. The session will cover topics such as normal variants, back pain, hip/knee pain and limp, arthritis, non-specific MSK pain and symptomatic hypermobility and weakness. The evening will be led by the specialist paediatric orthopaedic and rheumatology services at Cambridge University Hospitals.

This is a great opportunity to receive an update on important childhood musculoskeletal presentations with time to discuss assessment, management and referral pathways.

Lecture Theatre 2 | Clinical School of Medicine at Addenbrooke's Hospital Biomedical Campus

Wednesday 26 June 2019 | 18:45 - 20:45
