

# What can I do with the Home Oxygen Portal?

## Using the portal, you can:

- Submit Home Oxygen Order Forms online.
- Review previous Home Oxygen Order Forms you've submitted.
- Review Home Oxygen Order Forms submitted by colleagues within a prescriber group which can be requested via your HOS lead.
- Check patient prescription information such as flow and hours of use.
- Check what equipment and cylinders a patient holds.
- Review a patient's compliance with their prescription.
- See any safety concerns, either current or historic.

## The Portals digital interface provides a number of benefits over manual working practices, such as:

- Error Checking – When completing a HOOF via the Portal, it will inform you if you've omitted any necessary information or requested a flow or consumables that are incompatible with the equipment to be provided.
- Instant Receipts & Delivery – When a HOOF from the Portal is processed confirmation is immediately forwarded to your nhs.net email, and a second confirmation is sent to your email when the installation is completed. Furthermore, as the HOOF is not being sent via fax there is zero chance of transmission failure.
- Mobile Working – Work as you move by using the Portal on a tablet; discuss a new or old prescription with patients in person, move freely between locations, and access prescriptions and compliance at the touch of a button.

**Did you know – 26% of HOOFs sent by fax were rejected in Q1 2019?**

**From the 31st October all HOOF to be submitted via the Portal**

## How do I register for the Home Oxygen Portal?

Registration is quick and simple. Log on to [www.bochop.co.uk](http://www.bochop.co.uk), click "Register Here" and follow the instructions! Registrations are processed same day and you will receive email confirmation that you can now access the Portal. Once registered, you'll be given access to either the Part A or Part B online ordering forms based on your profession.

In order to register and to comply with Information Governance requirements, you will need:

- A @nhs.net email address.
- Internet Explorer 11 or the latest versions of Google Chrome or Mozilla Firefox on your computer or device.

As data is encrypted and transferred securely between the Portal and your device, you can access the Portal from anywhere you can get a connection without worry of data being intercepted in transit.

**Register now by visiting [www.bochop.co.uk](http://www.bochop.co.uk)**
