A new C&P Wound Care Management Template will shortly be available to SystmOne practices

C&P CCG Complex Wound Care Assessment and Management

Guidance and Information

****IMPORTANT****

C&P Wound repair review view cannot be shown when previewing a template

MANDATORY

If review being done by HCA, please check the view above. Only continue if the patient has been seen by RN in last 4 weeks

Enhanced Service Recording

Wound Care (Complex Dressings) Enhanced Service (2018/19)

Dressings of wounds that are complex in nature and require assessment/doppler and additional care through the healing process e.g. granulating, exuding, sloughy, requires debridement. These normally require a longer appointment slot - usually half an hour appointments or longer.

Ensure this is ticked at every patient consultation **unless originally seen as a Minor Injury consultation.**

LES Complex wound care

LES Source of referral - service provided at the request of GP

LES Source of referral - service provided at request of second. care

LES Referred by NHS 111 service

If using this template for a SIMPLE wound please refer to the
